## *Why Summer Theatre Matters*

Participating in musical theater during the summer offers children far more than time onstage—it fosters growth that lasts well beyond the final curtain call.

Summer theatre helps students:

- Build confidence and self-expression
- Strengthen communication and collaboration skills
- Develop discipline and responsibility
- Enhance empathy and emotional intelligence
- Create meaningful friendships through teamwork

For many students, a summer theatre experience becomes a defining memory—one that fosters independence, creativity, and a lifelong appreciation for the arts.
